

MAMO Plasti 330 - Foiling

Roll laminator with foiling kit and MSC Interface

COD. DPG330M-R

DESCRIPTION

Technically equivalent to the MAMO Plasti 330 model but with the addition of a practical rewinder for the use of foils for the finishing of the printed material (sleeking and spot varnishing effect). Once the rewinding mandrel has been removed, the machine can be used like Plasti 330 as a common hot laminator for both front and back and single-sided lamination.
