

MAMO Cala 72H

Cold laminator with upper roller heated

COD. DPG720C

DESCRIPTION

Electric cold laminator ideal for lamination, adhesive application, mounting on panels up to 15 mm thick and many other functions operated by MSC Interface. Electric liner retractor for cold lamination and adhesive film. Upper roll heated up to 60°C allows a more homogeneous lamination by reducing the 'dot' effect of cold lamination.

TECHNICAL SPECIFICATIONS

Laminating width: 720 mm
Feeding width: 750 mm
Max thickness: 15 mm
Speed max: 9 m/min.
Rolls diameter: 70 mm
Electric pedal control operated or with panel control
Voltage: 230V - 50/60Hz
Absorption: 780W

Dimensions: 1120x540x470 mm

Weight: 45 kg
