

# Perfone

## Manual 3-8 mm holes punching machine

COD. DPERFONE

---

### DESCRIPTION

Single head manual perforator. Maximum capacity of 300 mm. It can use various types of round drill bits with a minimum diameter of mm. 3 to a maximum of mm. 8. The construction has a modern design, strong aluminum structure, ideal both for office and industrial use. Thanks to the special table it allows to punch typical 4 holes (80 mm distance) very quickly by moving the bookblock to the two sides of the table (first two holes) and flipping the whole block for the same operation (last two holes).

---
