

Ciak Power 20

Substrate cutter - 210 cm - Cutting thickness 20 mm

COD. DRCIPW210

DESCRIPTION

The most advanced horizontal panel cutter on the market for a cutting thickness of up to 20 mm. Revolutionary cutting system with two independent cutting controls. The first control set the cutting depth to 4 possible levels (5, 10, 15, 20 mm) and allow to cut up to 20 mm in one single pass. The second control allows millimetric adjustment for accurate precision. No stress cut: just push the carriage and the machine maintains the cutting depth by itself. On request for left-handed operators handle contrary to the traditional one.
